13 Hitachi Chemical Technical Report No.54 1.2 Trends of Powder Metallurgy Technology In the overall material process technology industry, there are a variety of products utilizing P/M. Currently, main P/M

### **Recent Technology of Powder Metallurgy and Applications**

Advances in Materials (AM) publishes reviews, full-length papers, and short communications recording original research results on, or techniques for studying the relationship between structure, properties, and uses of materials. The subjects are seen from international and interdisciplinary perspectives covering areas including metals, ceramics, glasses, polymers, electrical materials ...

Powder diffraction is a scientific technique using X-ray, neutron, or electron diffraction on powder or microcrystalline samples for structural characterization of materials. An instrument dedicated to performing such powder measurements is called a powder diffractometer.. Powder diffraction stands in contrast to single crystal diffraction techniques, which work best with a single, well ...

Climate change is now a major concern. The polar ice caps are reported to be melting and sea levels are rising due to an increase in the average temperature of the Earth's atmosphere and oceans .Global warming is driven by increasing levels of tropospheric gases that contribute to the so-called greenhouse effect.

### **Fundamentals and advances in magnesium alloy corrosion**

Various novel techniques including ultrasound-assisted extraction, microwave-assisted extraction, supercritical fluid extraction, and accelerated solvent extraction have been developed for the extraction of nutraceuticals from plants in order to shorten the extraction time, decrease the solvent consumption, increase the extraction yield, and enhance the quality of extracts.

### **Recent advances in extraction of nutraceuticals from**

Tellurium is a chemical element with symbol Te and atomic number 52. It is a brittle, mildly toxic, rare, silver-white metalloid. Tellurium is chemically related to selenium and sulfur. It is occasionally found in native form as elemental crystals.

operating conditions of the application to evolve to the stage that alloy 625 has become the material of choice for waterwall overlays and superheater tubing in waste-to-energy (WTE) steam boilers. To a great extent this paper will confirm the fact that alloy 625 and its immediate derivatives are the solution

General Perspective - The Journal of Alloys and Compounds is an international peer-reviewed medium for the publication of work on materials comprising compounds as well as alloys. Its great strength lies in the diversity of disciplines which it encompasses, drawing together results from materials science, physical metallurgy, solid-state chemistry and physics.
