Proportional representation (PR) characterizes electoral systems in which divisions in an electorate are reflected proportionately in the elected body. If  $n\%$  of the electorate support a particular political party, then roughly  $n\%$  of seats will be won by that party. The essence of such systems is that all votes contribute to the result: not just a plurality, or a bare majority, of them.

Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants. Today, game theory applies to a wide range of behavioral relations, and is now an ...
