Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Introduction. For a long time, the traditional project management approach has been questioned due to the large number of failing projects. Moreover, due to market globalization and related growing organizational and productive complexity, a need for adaptive continual change and team empowerment has emerged, which have led to more flexible and participatory management approaches (Bartle, 2007).
