Regardless of which method you choose, though, itâ€™s usually a good idea to build your fire by placing the tinder in the center and kindling stacked over it. When you light the tinder, the heat will rise up to the kindling, igniting it while subsequently creating enough heat to ignite the main firewood.

Tinder vs Kindling: What's the Difference? - Fire Pits

Starting your fire requires the use of tinder and kindling. The tinder should easily ignite with a match and begin burning. It will then ignite the kindling followed in turn by the larger logs. Newspaper makes good tinder. Good kindling would be small dry sticks and branches, the dryer the better. Kindling should not be more than an inch in diameter.
