

integrated pest and disease pdf

For farmers, IPM is the best combination of cultural, biological and chemical measures to manage diseases, insects, weeds and other pests. It takes into account all relevant control tactics and methods that are locally available, evaluating their potential cost-effectiveness.

Integrated Pest Management - CropLife International

Basic principles of Integrated Pest Management : 1.Consideration of Ecosystem : Control of insect pest population is a function of the ecosystem itself by means of natural enemies and other factors. Knowledge of the role of the principle elements of the units is essential to an understanding of population phenomenon.

PRINCIPLES AND CONCEPTS OF INTEGRATED PEST MANAGEMENT - NIPHM

Integrated Pest Management. The key to crop management in any farming system is the prevention of anything that will decrease the amount of crop harvested. Pest insects feeding on plants, for example, can reduce harvests or destroy crops. The key to prevention is healthy plants and the key to healthy plants is in the soil.
