

modeling complex computer and pdf

In 3D computer graphics, 3D modeling is the process of developing a mathematical representation of any surface of an object (either inanimate or living) in three dimensions via specialized software. The product is called a 3D model. Someone who works with 3D models may be referred to as a 3D artist. It can be displayed as a two-dimensional image through a process called 3D rendering or used in a ...

3D modeling - Wikipedia

Modeling and simulation (M&S) at simple terms is a substitute for physical experimentation, in which computers are used to compute the results of some physical phenomenon. As it is apparent from its name "Modeling and simulation" firstly a computer is used to build a mathematical model which contains all the parameters of physical model and represent physical model in virtual form then ...
