Cott described the decorator crabs as using "concealment afforded by masks of adventitious material", giving as example the great spider crab *Hyas araneus* of Britain "which disguises itself very perfectly". When *H. araneus* specimens were moved from an environment where all the crabs were camouflaged with short pieces of seaweed into different environments, all of them had redecorated ...

California Agriculture - Current issue and featured articles. Multiple species of Phytophthora have been identified in production facilities of plants used in reforestation and restoration projects. There's a risk that infected plant stock will lead to Phytophthora species establishing and spreading in habitats that, having never experienced their presence, may be highly susceptible to infection.
