NEC-2 Manual, Part III: User's Guide

ABSTRACT The problem of modeling blood flow can be approached on different levels of accuracy. We investigate a model consisting of two major components: the fluid representing blood plasma and the elastic objects representing all types of cells in blood, e.g. red blood cells.

Finite-difference time-domain or Yee's method (named after the Chinese American applied mathematician Kane S. Yee, born 1934) is a numerical analysis technique used for modeling computational electrodynamics (finding approximate solutions to the associated system of differential equations). Since it is a time-domain method, FDTD solutions can cover a wide frequency range with a single ...

Finite-difference time-domain method - Wikipedia

Abstract: In this paper, two different methods are studied to solve numerically time dependent Maxwell's equations in two dimensions. The methods are, the Discontinuous Galerkin Method (DGM) and the Variational Iteration Method (VIM).

On the numerical solutions of two dimensional Maxwell's

ABSTRACT The transport performance of Nb₃Sn cable-in-conduit conductors (CICCs) depends on the strain distribution along the superconducting filaments determined by the combination of electromagnetic and mechanical forces applied to the strands.

Hugo Bajas | CERN - Academia.edu

General. Iterative method; Rate of convergence "the speed at which a convergent sequence approaches its limit . Order of accuracy "rate at which numerical solution of differential equation converges to exact solution; Series acceleration "methods to accelerate the speed of convergence of a series . Aitken's delta-squared process "most useful for linearly converging sequences

List of numerical analysis topics - Wikipedia

This note explains about waves, rays and the various techniques used in applied and environmental geophysics to investigate subsurface structure on scales of meters to kilometers.

International Journal of Theoretical and Applied Mathematics (IJTAM) is a peer-reviewed journal on all areas of theoretical and applied mathematics and methods to solve problems in engineering, natural sciences, and business through mathematical, computational and statistical methods. Topics of interest include, but are not limited to: pure mathematics, applied sciences, approximation theory ...

Geotech Ltd. was established over 25 years ago, building advanced airborne electromagnetic equipment for the exploration industry. The company's instrumentation development has included VTEM_ϕ (versatile time-domain electromagnetic system, Figure 1a) in 2002 that is the Geotech award winning and industry leading airborne EM technology.
