Synthesis. Phenanthroline may be prepared by two successive Skraup reactions of glycerol with o-phenylenediamine, catalyzed by sulfuric acid, and an oxidizing agent, traditionally aqueous arsenic acid or nitrobenzene. Dehydration of glycerol gives acrolein which condenses with the amine followed by a cyclization.. Coordination chemistry. In terms of its coordination properties, phenanthroline ...

### **Phenanthroline - Wikipedia**

The principles and their application for the synthesis of some of the naturally occurring compounds will be described in this note. Major topics covered includes: Formation of Aliphatic Carbon-Carbon Bonds: Base Catalyzed Reactions and Acid Catalyzed Reactions, Organometallic Reagents, Nucleophilic Aromatic Substitution, Aromatic Diazonium Salts, Molecular Rearrangements, reagents Containing ...

Although most compounds are referred to by their IUPAC systematic names (following IUPAC nomenclature), "traditional" names have also been kept where they are in wide use or of significant historical interests.

1.. Introduction Starting in the late 1960s, we have been involved in an unfolding story whose main character is the fascinating material titanium dioxide (TiO<sub>2</sub>). This story began with photoelectrochemical solar energy conversion and then shifted into the area of environmental photocatalysis, including self-cleaning surfaces, and most recently into the area of photoinduced hydrophilicity, which ...
