

psychological adaptive mechanisms ego pdf

Regression (German: Regression), according to psychoanalyst Sigmund Freud, is a defense mechanism leading to the temporary or long-term reversion of the ego to an earlier stage of development rather than handling unacceptable impulses in a more adaptive way. The defense mechanism of regression, in psychoanalytic theory, occurs when an individual's personality reverts to an earlier stage of ...

Regression (psychology) - Wikipedia

Psychological resilience is the ability to successfully cope with a crisis and to return to pre-crisis status quickly. Resilience exists when the person uses "mental processes and behaviors in promoting personal assets and protecting self from the potential negative effects of stressors". In simpler terms, psychological resilience exists in people who develop psychological and behavioral ...
